

# Bibliography

The bibliography is intended to be practical rather than encyclopedic. I have listed books and websites that I have found provide background and examples that are helpful in learning about and implementing trading system with the characteristics that have high probability of being profitable with low risk.

This list is heavy in machine learning, pattern recognition, probability, statistics, modeling, and simulation—because those topics are of primary importance in developing quantitative trading systems. It is light on traditional trading systems, indicators, and charting—because those topics are not very useful for systems that fit the trading profile most likely to be profitable.

## Machine Learning, Data Analysis

Abu-Mostafa, Yaser, Malik Magdon-Ismael, and Hsuan-Tien Lin, *Learning from Data*, AML Books, 2012.

—, *Machine Learning*, California Institute of Technology, online course. <https://work.caltech.edu/>

Aronson, David, and Timothy Masters, *Statistically Sound Machine Learning for Algorithmic Trading of Financial Instruments: Developing Predictive-Model-Based Trading Systems Using TSSB*, Aronson, 2013.

Bishop, Christopher, *Pattern Recognition and Machine Learning*, Springer, 2007.

- Bishop, Christopher, *Introduction to Bayesian Inference*, video lecture.  
[http://videlectures.net/mlss09uk\\_bishop\\_ibi/](http://videlectures.net/mlss09uk_bishop_ibi/)
- Box, George, and Friends, *Improving Almost Anything: Ideas and Essays*, Revised Edition, Wiley, 2006.
- de Freitas, Nando, *Machine Learning and Data Mining*, University of British Columbia, video lectures.
